It's like the Order of the Garter in England.'

When it was given to you it gives you an aura of responsibility that you carry for the rest of your life. I go into court the judges will say, 'Here you are, Mr. Brown, you're the best accountant in the country.' I don't know if I am, but it's nice to have that aura around you. I'm no longer just another accountant. I'm the Order of the Garter.'

The Order of the Garter was founded by King Edward III, who wanted to reward his best soldiers and knights. The Order of the Garter is considered to be one of the most prestigious and ancient orders of chivalry in the world. It was established in 1348 and is open to men and women of exceptional merit and service to their countries.

The badge of the Order of the Garter consists of a blue ribbon, a gold star, and a pair of cornucopias. The grand cross of the order is awarded for outstanding service or merit, and the knight's cross is awarded for distinguished service.

The Order of the Garter is considered to be a symbol of honor and distinction, and its recipients are often cited as examples of exceptional service and dedication.

So, the Order of the Garter is like an honorary title that is given to people who have made significant contributions to their communities and countries. It is a title that carries a great deal of prestige and respect, and it is one that many people aspire to receive.

"I've never even had the experience before. I was thinking of all the exciting things to me of the ceremony of being appointed, of the people," said the recipient.

The recipient was a man who had been a successful business owner and had made significant contributions to his community. He had been involved in various charitable organizations and had volunteered his time and resources to help others.

Like many other recipients, Recipient A was glad to receive this honor, and he was looking forward to using his new title to continue to make a positive impact in his community.

"I'm just glad that I was able to do it," said Recipient A. "I think it's important to give back to the community, and I'm glad that I was able to do something so meaningful."
MODERATE—Edward Carter, an influential moderate, has made eight recent appointments and, hearing death or retirement, will make no more before his second term ends in December. All Steagles' appointments have been Republican in nature, as in thesvg over 12 years of conservative policies.

One of the first names of concern was Jeanet Williams, who, as assistant director of the National Park Service, has been an advocate of conservation policies. As a result, the National Park Service has appointed her as the first woman to head the agency.

The new laws and regulations have been enacted to protect and conserve natural resources. These laws are designed to ensure the conservation of natural resources for future generations.

The new laws will also help to protect the environment and limit pollution. The government has implemented new regulations to reduce pollution and protect the environment. These regulations will help to ensure the longevity of natural resources.

In addition, the government has implemented new regulations to protect the environment and limit pollution. These regulations will help to ensure the longevity of natural resources.

few, new programs are being recommended by the university
and certain medical schools and other university
faculties. There is a need for new programs.

"Our main goal is to provide more opportunities for
students," said Mr. McElderry. "We are trying to
make it easier for students to get into medical
school, and we're trying to make it easier for
students to get into other programs.

"The university's role in the legislature is quite
important. The university is a large and powerful
force in the state. It has a lot of influence and
can make a difference in the legislature.

"From the student point of view this should be
considered as the most important change in the
state in recent years," Mr. McElderry said.

"But, there is a group in the legislature which, I,
believe, does not want to see this happen. This
is a group which wants to see the university's
role in the legislature remain as it is. This group
wants to see the university's role in the legislature
remain as it is. This group wants to see the
university's role in the legislature remain as it is.

"It is not fair to the students. It is not fair to the
university. It is not fair to the state. It is not fair
to the people of the state."

L.A. Doctor to Receive
AMA Award
Dr. William F. Hume, director of research at the
Laurel Research Institute in Los Angeles, will receive
the American Medical Association's top award for the
year. He has been honored for his work in
research and patient care.

Dr. Hume has been a leader in the field of
research and has made significant contributions to
the understanding of diseases and the development
of new treatments.

All Pilots Asked
Not to Fly Over
Bowl Concerts
Los Angeles county officials are asking all pilots
to refrain from flying over the Hollywood Bowl
during the summer season. The officials said that
plans are being made to allow pilots to fly over
the stadium on a limited basis.

"We do not want to interfere with the concerts,"
said Jack Wilson, director of the Los Angeles
County Department of Parks and Recreation.

"We are just trying to make sure that everyone
is safe and that there is no disruption of the
events.

Argentina Starts
Blast Furnace
Buenos Aires (AP) — Argentina's largest blast
furnace has been inaugurated. The new furnace
will be used to produce steel for the automotive
industry.

"This is a major step forward for the steel
industry in Argentina," said Minister of Industry
Guillermo de la Sota. "We have been working
on this project for several years and we are
happy to see it finally come to fruition.

"The new furnace will have a capacity of 1.5
million tons per year. We expect it to start
producing steel within six months.

AMENDMENT
Continued from 1st Page
- The members of the executive committee of the
university's board of directors have agreed to
endorse the amendment.

- The amendment would increase the number
of members on the university's board of directors
from 12 to 15. This would allow for more
representation of the university's various
interests.

- The amendment would also increase the
power of the university's board of directors,
allowing it more control over the university's
operations.

- The amendment would provide for the
appointment of a chancellor, who would serve
as the chief executive officer of the university.

- The amendment would also provide for the
appointment of a provost, who would serve as
the chief academic officer of the university.

- The amendment would provide for the
appointment of a vice chancellor, who would
serve as the chief financial officer of the
university.

- The amendment would also provide for the
appointment of an executive vice president,
who would serve as the chief operating officer
of the university.

- The amendment would provide for the
appointment of a vice president for academic
affairs, who would serve as the chief academic
officer of the university.

- The amendment would also provide for the
appointment of a vice president for student
affairs, who would serve as the chief
student officer of the university.

- The amendment would provide for the
appointment of a vice president for university
affairs, who would serve as the chief
c counsel of the university.
GOES TO VOTERS IN NOVEMBER

L.A. Rapid Transit Program at a Confused Crossroads

By RAY HERBERT

Hearst Times-Dispatch

MONTREZ — The President of the United States said yesterday that his administration must be made to clear up dysfunctions in its Interstate Highway System.

"I have been warned," the President said, "that the Congress has not been satisfied with the progress made in this area.

"I have been assured," he continued, "that the committee has not been satisfied with the performance of the Federal Highway Administration.

"I have been informed," he added, "that the Congress has not been satisfied with the administration of the Department of Transportation.

"I have been told," he concluded, "that the Congress has not been satisfied with the performance of the Secretary of Transportation."
